Application/Control Number: 10/809,600

Art Unit: 1641

Applicant's election of Group II, claims 9-13, in the paper filed 01 February 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 1-8 and 14-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9-13 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 9-13 are method claims and, as such, they should clearly set forth the various method steps in a positive, sequential manner using active tense verbs such as mixing, reacting, and detecting. The recitation of "using" is not a valid method step. The claims should also clearly state each component used in the method and the relationship of the various components. Method claims should also conclude with a step relating the method result to the purpose of the method, preferably to the purpose as also set forth in the preamble of the claim. In these claims, "the presence or absence" and "the reaction" lack antecedent basis.

In claims 12 and 13, "the solid support" lacks antecedent basis.

Application/Control Number: 10/809,600

Art Unit: 1641

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-13 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Douillard et al. (Meth. Enz. 92: 168, 1983).

Douillard et al. teach determination of positive responses for antibody analytes with enzyme-linked immunosorbent assays. Negative controls include irrelevant antigens (see e.g. pages 169 and 172), a set of unrelated antibodies (see e.g. pages 171-172 and 174), medium alone (see e.g. page 174), and buffer alone (see e.g. pages 172 and 174). Positives are those wells with values above value(s) in the well(s) chosen as the negative (see e.g. pages 172 and 174). The reference obtains an arithmetic mean of the values from all the negative controls (see e.g. pages 172 and 174) for determinations.

Claims 9-13 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Hoffman et al. (US 5,599,543).

Hoffman et al. teach determination of positive responses for antibody analytes in serum samples with enzyme-linked immunosorbent assays. Negative controls include irrelevant antigen control wells and/or antigen-free wells, and at least one negative control serum. The values from the negative control wells as well those of the negative control sera are subtracted from the relevant antigen wells for determinations of positive responses.

Application/Control Number: 10/809,600

Art Unit: 1641

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mehta et al. (US 5,753,430) teach the routine nature of comparing sample reactivities of antibody analytes to multiple non-specific antigens (see e.g. cols. 8-11 or 15-19 or 24-26).

Tidey et al. (US 6,046,013) teach determination of anti-HLA responses.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James L. Grun, Ph.D., whose telephone number is (571) 272-0821. The examiner can normally be reached on weekdays from 9 a.m. to 5 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long Le, SPE, can be contacted at (571) 272-0823.

The phone number for official facsimile transmitted communications to TC 1600, Group 1640, is (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application, or requests to supply missing elements from Office communications, should be directed to the Group receptionist whose telephone number is (571) 272-1600.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
